

2024 FIRE SEASON PREPARATION

DOWNLOAD: Firehawk Burn Permit App

Firehawk have upgraded their burn permit app, making it easier for landowners, detection and the FPA to manage controlled, permitted and non-permitted prescribed burning – please note the following;

- **ALL MEMBERS ARE ENCOURAGED TO DOWNLOAD THE PERMIT APP – IT WILL MAKE YOUR LIFE MUCH EASIER DURING FIRE SEASON**
- The Firehawk Permit App (V2) can be downloaded from your App Store or via the web onto your laptop/desktop <https://firepermitsv2.web.app/> – once downloaded, follow the simple instructions
- The App was updated on 31 July 2023
- Ensure you register for the LRFPA region
- You can load all your properties / farms
- The menu provides;
 - User details
 - Request a permit
 - My permits – history of your permits
 - Todays Map
 - Disclaimer
- The new App requires users to:
 - Geo-locate where the burn will take place – either physically at the site or by locating the area on the map provided
 - The geo location is then interfaced with detection and when your fire burning activity starts, and detection picks up the smoke, the two geo location references will align (detection & permit)
 - This allows detection operators to have more accurate acknowledge of controlled and permitted burns
 - Acknowledge that you acknowledge (tick) the disclaimer and in turn will abide by the rules & regulations of the FPA.
 - If the above is not done, a permit will not be issued.

Thank you to Firehawk for their continuous improvements and assistance to the Lions River FPA
